How do I display a collection of photos one-by-one without the picture switching after a certain time?

First, choose the photos you want in your set of pictures. You can do this either by holding down the Ctrl key and clicking on each individual picture or by clicking on the first picture then the last picture in a group while holding down the Shift key. You will know you have selected pictures when the border around them is blue.

After you have selected your pictures, click on Display in the upper right corner of the screen and select View Photos in Full Screen.
How do I display a collection of photos one-by-one without the picture switching after a certain time?

The photo will remain on the screen until you scroll to or click on the next one with the mouse.
