How do I select a group of pictures for words with the same number of syllables?

First, click the triangle next to Syllables on the keyword tags menu.

If you want all the one syllable words in the catalog, click the box next to 1 Syllable to show those pictures.

For words with more than 1 syllable, you can choose a specific syllable stress pattern. To do this, click the triangle next to the category to expand it and view the stress patterns.
For example, to choose 3 syllable words with Sws (primary-weak-secondary) stress pattern click the box next to that label.
