How do I select a group of pictures that are in the same semantic field (e.g. animals, birds, language, tools)?

First, from the **Keyword Tags** menu, click the **triangle** to the left of the **Semantic Fields** category to expand it.

From the **semantic fields** menu, click the box next to **Animals** to show all animals in the catalog or click the **triangle** next to **Animals** to expand the category more specifically.

For example, to show all farm animals in the catalog click the box next to **Animals-Farm**.
