How do I turn audio on or off during a slideshow?

First, choose the photos you want in your slideshow. You can do this either by holding down the Ctrl key and clicking on each individual picture or by clicking on the first picture then the last picture in a group while holding down the Shift key. You will know you have selected pictures when the border around them is blue.

After you have selected your pictures, click on Display in the upper right corner of the screen and select View Photos in Full Screen.

Uncheck the box that says Play Auto Captions.
Finally, click OK to play your slide show without sound.
