

# **SPPA 2220 Child Speech Sound Disorders**

## Terminology to review for First Exam

- acoustic property
- age cohort
- allomorph
- allophone
- allophonic rules
- articulatory property
- ash
- assessment
- auditory-visual mapping of speech sounds
- autosegmental phonology
- bimorphemic cluster
- binary feature
- caret
- categorical perception
- citation form
- closed syllable
- cluster
- cluster element
- coarticulation
- cognate
- continuant
- cooing
- criterion-referenced test
- delayed imitation
- diacritic
- diphthong
- discrimination training
- distinctive feature
- Early 8, Middle 8, Late 8
- emerging phonology
- epsilon
- esh
- evaluation
- external discrimination
- external microphone
- ezh
- feature distance
- feature geometry
- feature tier
- flap
- formal screening
- generative grammar
- generative phonology
- gloss
- glottal stop
- grammatical morpheme
- high amplitude (preferential) sucking
- homorganic
- homotypic
- hooked 3
- hooked schwa
- iambic
- idiosyncratic (unusual) phonological process
- informal screening
- initial impressions
- intelligibility
- internal discrimination
- intonation
- jargon
- linguistic perception
- Locke's Speech Production- Perception Task (SP-PT)
- manner
- markedness
- meter
- metrical phonology
- minimal pair
- morpheme structure rules
- morphophonemic rules
- mouth-to-microphone distance
- natural phonology
- natural sound class
- naturalness
- nonlinear phonology
- normative data
- open o
- open syllable
- overlapping speech
- perceptual constancy
- phone
- phoneme
- phoneme mastery

- phonemic
- phonetic
- phonetic form
- phonetic inventory
- phonological representation
- phonological rule
- phonology of first 50 words
- place
- prelinguistic vocalization
- primary stress
- process suppression
- progressive idiom
- raw score
- recording level
- reduplicated babbling
- residual errors
- rhythm
- schwa
- screening
- script a
- secondary stress
- sequential constraints
- singleton
- small cap l
- sound avoidance
- sound preference
- special populations
- speech delay
- speech normalization
- standard score
- stimulability
- stress
- strong vowel
- suprasegmentals
- syllabic consonant
- Syllable Structural Level (SSL)
- theta
- thorn
- trochaic
- underlying representation
- upsilon
- variable process usage
- variegated babbling
- vocal play
- voice onset time
- vowel reduction
- weak vowel
- whole word accuracy
- word shape

- yod
